

Getting Started with AirClass: How to Create Your Account

- 1 To create an AirClass account: visit airclass.com and then click on the **“Try It Out”** icon located at the top-right side of your screen, or go directly to the registration page at app.airclass.com/#/register.

Once you’re on the AirClass registration page, enter your information, starting with the name and email address you’d like others to view. Then create a strong password you’ll use to sign in.

- i You may also use your existing Google or Microsoft accounts to sign in.

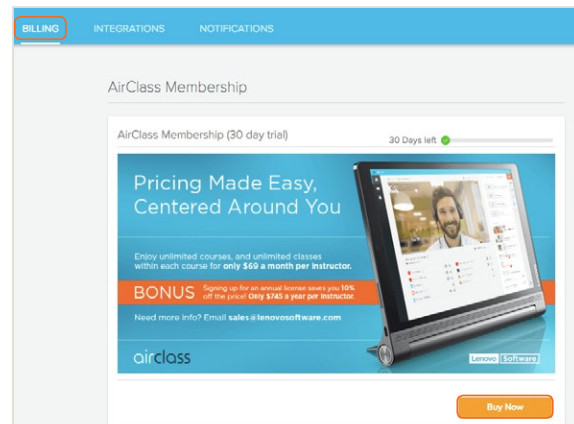

Then you’ll be taken directly to the dashboard. (That’s right: No credit card required for first 30-day trials.)

In the top left, click **“Account,”** followed by **“Profile.”** This is where you can customize a few details to help personalize your training sessions:

When selecting a profile picture, choose the image you’ll want everyone to see.

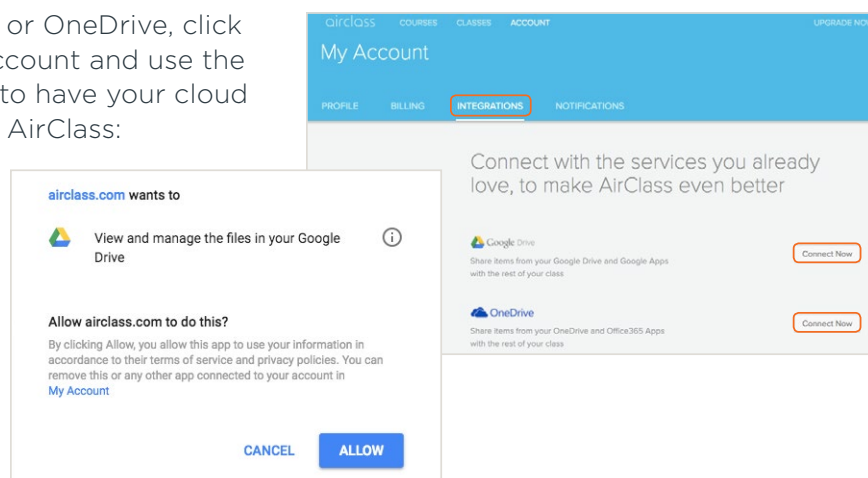

- i This is also where you will come to change your password if needed.

- 3 Any time you'd like to see how many days remain in your free trial, visit the **"Billing"** tab:
To purchase a subscription, click **"Buy Now."**

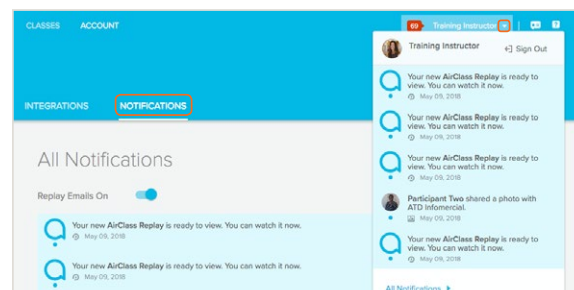

- 4 If you use Google Drive or OneDrive, click **"Integrations"** under Account and use the **"Connect Now"** button to have your cloud storage integrated with AirClass:

This will make it much easier to upload all your files and videos.

- 5 To review all the activity in your account, click **"Notifications"** or on your name at the top right of any page.

Now you're ready to plan **your first live event in AirClass.** Next up, we'll show you how to create your first class.
